

ACADÉMIE JOHN CABOTO ACADEMY

*In the community
For the community*

*Dans la communauté
Pour la communauté*

John Caboto Academy has been a community school for the past 40 years and offers an extremely successful Bilingual Program serving the needs of its multicultural families with a wide variety of programs, activities and outings. Children attending John Caboto Academy don't just go to school, they participate in an experience they will cherish their whole lives.

John Caboto Academy continues to offer a well-rounded educational program. We focus on reinforcing a solid base through literacy and numeracy programs, and also offer a STEAM initiative program with one hour per day in Cycle 1 and one hour per week in Cycles 2 and 3.. Our science program is emphasized at all levels focusing on various themes using the scientific method of exploration, all in line with the Ministry program. The arts as well are supported through sound comprehensive programs both in music and fine arts.

The school's mission is to foster opportunities that will enhance the development of each student. The key to our success has been to focus on academic success as well as to promote self-respect and respect for others. We are a school open to the world and we believe that academic excellence must be fostered in an environment of respect and responsibility.

Two Pre-Kindergarten class to prepare children for their future schooling and to learn to socialize.

Homework assistance and after-school programs and activities.

An enriched educational program with personalized attention to students with difficulties.

A computer lab, tablet cart, laptops and 3D printer integrated into the curriculum.

A variety of innovative projects through the dynamic BASE Daycare Program.
