COC MAJOR EMERGENCY

Olympic Villages:
• The Health and Science Team has developed an internal health/medical plan should a large-scale emergency occur requiring the provision of medical care/services to members of the COT.

Coping with a major emergency:
• In the event of an emergency situation, the COT offices in the Olympic Villages will open and all team members will have the opportunity to contact COT members’ families to reassure them of their safety as soon as communication lines can be freed up.

Evacuation:
• Should the emergency situation be large scale, the COC might make a decision based on intelligence received to evacuate the COT to a safer place. This may involve the participation of local authorities in conjunction with the COT Security Liaison Officer and DFATD as needed.

1-800# for Family and Friends to call:
• Family and Friends of COT members who hear about a major emergency can call an emergency number (in Canada) to receive status updates on The Canadian Olympic Team members. This number will be provided by the Department of Foreign Affairs, Trade and Development (DFATD) if an emergency arises.
OVERVIEW- COC

• In the event of an emergency involving a member of the Canadian Olympic Team (player or staff member), the COC has the responsibility for overseeing the situation. The COC will be supported, as required, by the Canadian Government (i.e. Embassy in Moscow) and other support organizations.
