

Dr. Sakshi Rai

I'm Sakshi Rai, a practicing dentist in Toronto since 2024. I hold a BDS and MSc in Orthodontics and come with an experience of over 7 years from India. Currently, I lead a practice that emphasizes patient-centered care and cutting-edge dental techniques.

Over the years, I've led several initiatives aimed at improving patient access to care, and have mentored new dentists entering the field.

If elected, I am committed to fostering greater collaboration between regulatory bodies and practitioners to ensure that patient safety and high standards of care remain our top priorities. I also aim to promote ongoing professional development to help all dentists stay at the forefront of emerging technologies.

Throughout my career, I've been deeply involved in community outreach, organizing free dental care days for underserved populations. I believe that all dentists have a responsibility to give back and support the communities they serve.

I am passionate about continuing to elevate the standard of dental care in Ontario. With your support, I will work tirelessly to represent the public interest and ensure that our profession remains both progressive and patient-focused.
